Here is draft message addressing your questions/comments for your review. (please note, not added to message but in response to your question - CSB drops by the site on occasion to verify information the agency needs for a mapping survey. Other than that, no other federal agencies have a presence on site.)

Sorry, on the Tablet and pressed Send before Past. Here is the Weekly information...

WV Spill – Freedom Industries - Region III proposes to discontinue maintaining a daily on-site presence at the Freedom Industries facility in Charleston, West Virginia. The current operations at the site are routine and consist of pumping and controlling of water, along with maintenance of boom in the river, following plans prepared by the company that have been reviewed by the State and the EPA. West Virginia Department of Environmental Protection (WVDEP) water and waste enforcement staff now are at the Freedom facility overseeing operations from 8am to 8pm daily. If conditions change, or if WVDEP needs federal on-site assistance, two Region III On Scene Coordinators (OSCs) who live in the Wheeling Area would be able respond within 3 hours. These OSCs are also available by phone and email to provide any guidance that WVDEP may request. EPA's START contractors can be redeployed as EPA requires. I am coordinating with HQ before we do anything, but hope to make a decision in the next day or two.

Mathy & his folks are on board.

Below is what I included in my Weekly to the Administrator & Deputy. Linda is finalizing a note that Mark Ferrell could send to his contacts in the Congressional offices. I will have her send it to you shortly. I will also be calling Secretary Huffman before the end of the day. Please let me know ASAP if you have any questions, comments and/or concerns.

Thank you – Shawn
